DIGGSLY

WHAT IS DIGGSLY?

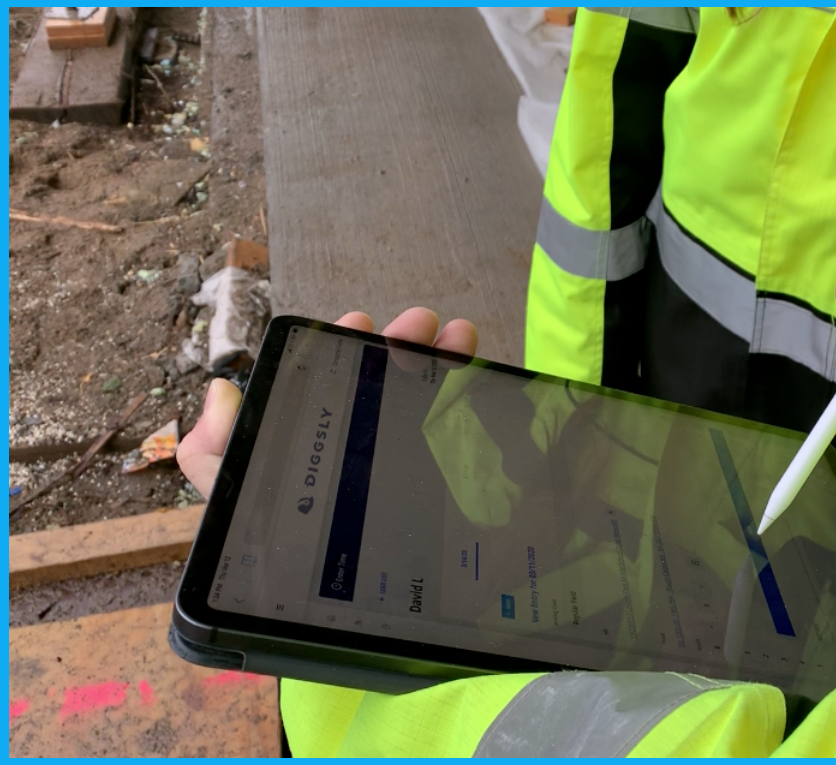
Diggsly is a **cloud platform** built for the **construction industry**. It is the byproduct of years of dedication to bringing better technology to the construction industry, which has been overlooked and underserved.

Our partnerships with the **best construction companies** in the Midwest have made Diggsly possible.

DIGGSLY IS A CONSTRUCTION-FOCUSED SOLUTION BUILT TO SOLVE PROBLEMS AND ENHANCE WORKFLOWS

The Diggsly team specializes in:

- Geospatial Government Tools
- Web & Mobile Apps
- Enterprise Software
- Executive & Startup Consulting
- Modern Design & User Experience



*“ Diggsly provided us with a means to take a large amount of knowledge, currently held by one or two people, and **transform it into an operating system**. This allowed us to **eliminate risk** and more **efficiently manage** the company.*

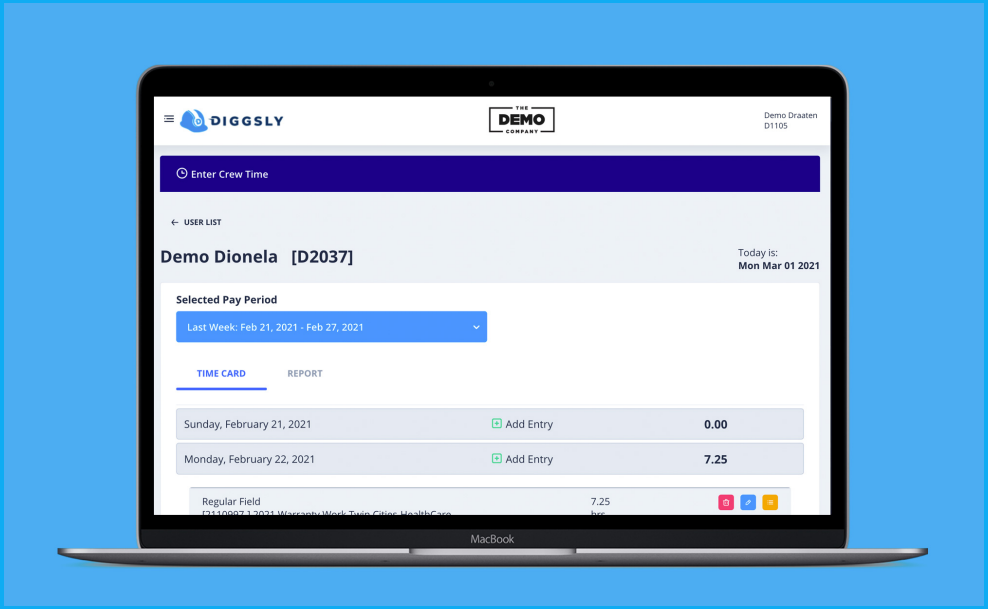
- **President & CEO**, Kraus-Anderson Construction Company

“ Choosing Diggsly as our technology solution provider gave us the perfect balance between a ready-made software and ***custom developed*** *application. Diggsly brought the knowledge of a* ***construction industry background****, paired with the ability to customize software to our specific operational needs—****a combination we couldn’t find with any other software provider****.*

- **Director, Lean and Process Improvemen,** 500+ Employee GC

WHY DIGGSLY?

- A unified suite of digital solutions to **streamline construction company operations**
- Allows you to **do much more with the data you already have**
- **Customizable** to your specific needs and use cases
- **Scalable** to companies of any size and area of operation



CONSTRUCTION-FOCUSED

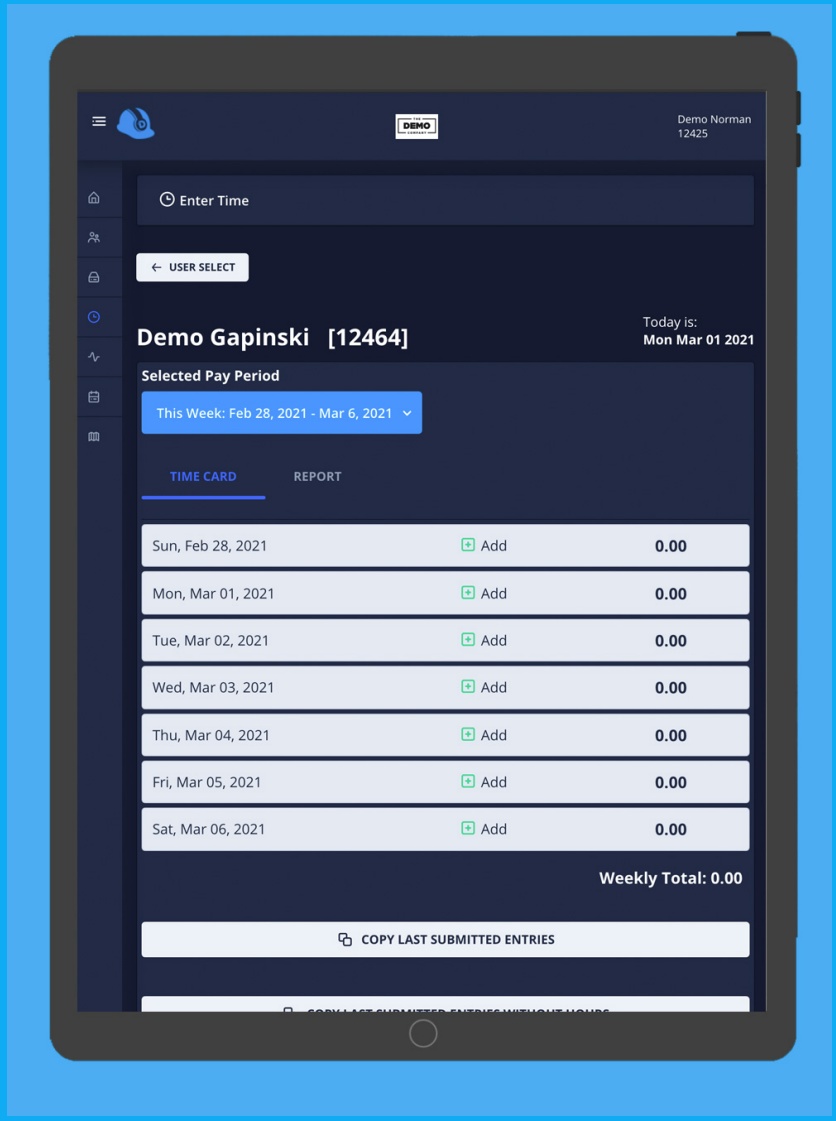
Our developers lived and breathed the problems of construction industry employees, contractors, and executives for over 6 years.

Diggsly is the result.

THE FOUNDATION HAS BEEN POURED

Diggsly can **fully integrate with your existing ERP systems or other data sources**—letting you do much more with the data you already have.

Unlike every other solution on the market, **Diggsly doesn't lock you into a database solution** or require painful data migrations that can grind your operations to a halt. We use what you already got!



FEATURES

SCHEDULING

No more spreadsheets!

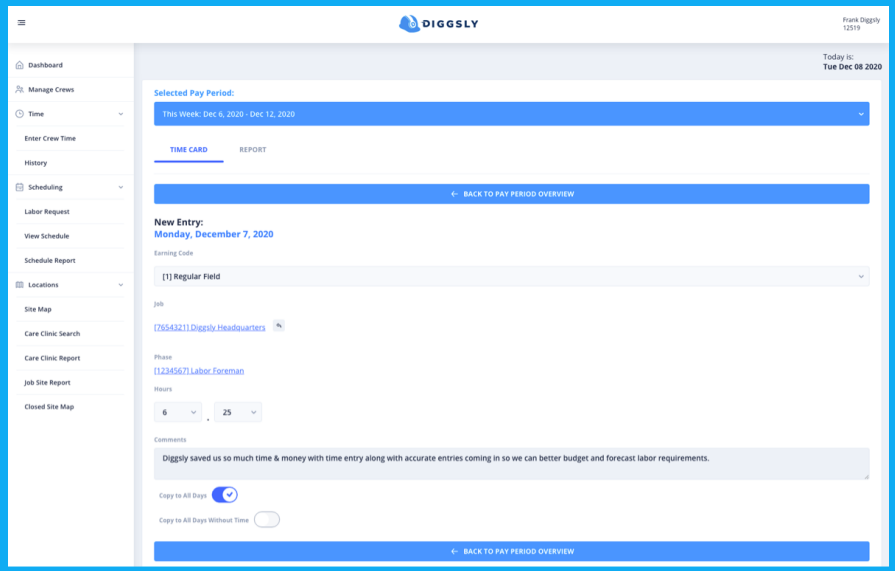
- **Track and manage** labor assignments
- 2-way labor requests initiated by the field, completed by the scheduler
- **Real-time** text & email notifications to the workforce
- **Track upcoming needs** without having to commit someone

- Multi-location capable so **different schedulers can manage different company locations**, branches, et al.
- Worker acknowledgements, multi-assignments, custom start times, holiday, off-day flags, and much more.

TIME TRACKING

No more paper!

- Designed for field & office
- **Flexibility** in placing key personnel with crew management for the field
- Pre-approval, approval, rejection, and flagging of time provide **a workflow everyone can understand**
- Copy daily time with a single click or copy an entire pay period to **keep manual entry to a minimum**

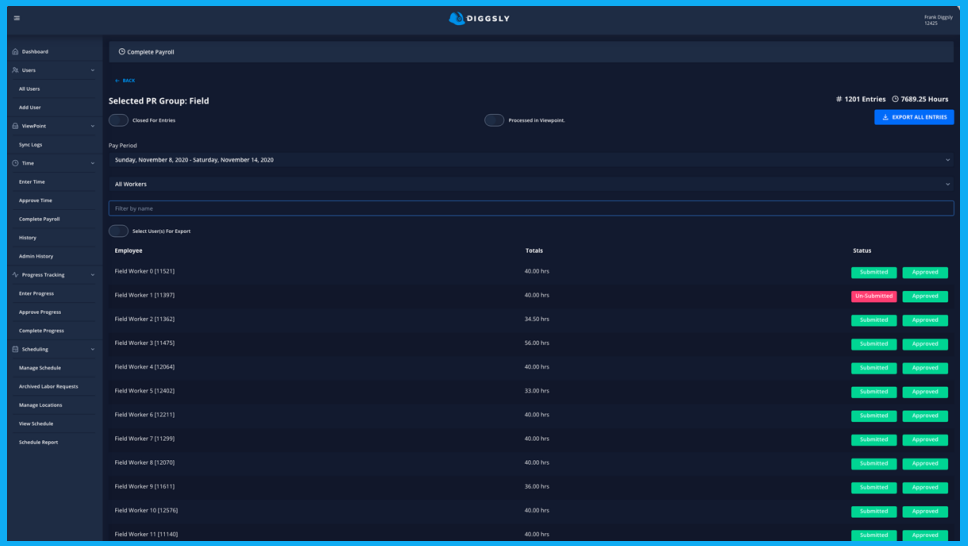


- **Built for accuracy** to include only job phases applicable to each worker
- **Clear steps** allow you to easily see where each workers' time is in the pipeline

PAYROLL INTEGRATION

No more headaches!

- **Export all time entries with a single click** to a Viewpoint Vista-friendly file, processing payroll quickly and accurately
- Supports multiple payroll groups in one interface
- **Easily manage adjustments** before processing



- Filters make it **easy to find workers or entries** before they enter a payroll batch and become a problem
- Prevent workers from entering time while payroll is being finalized

JOB SITE LOCATION

No more questions!

- **Interactive maps** of all job sites & care clinics
- Filters to narrow your results quickly
- Job site locations with key personnel contact info make finding the information you need a breeze
- **Easily navigate** and even call someone at a site
